Combine data from different sources - view in Excel!

starting at

Up and running in days, not months.  
100% Cloud -- Zero Hardware. Zero Installation.

**\$500 / mo.**

## OVERVIEW

*Bridgette Reporting* combines data from different sources, (eg. Zuora and Salesforce) and uses SQL to query and join data. View reports using Excel, where formulas and pivot tables stay intact and data can be refreshed with a single click. Create reports that use Salesforce data and Zuora data, such as Commission Reports. Automate data sources exports, instead of downloading CSV files manually. Let Bridgette solve your complex reporting needs!

## USE CASES

- Automate data sources exports
- Combine Zuora and Salesforce data
- Refresh Excel files that have pivot tables and formulas

## WHAT IS INCLUDED?

- Development of 3 custom reports.
- Training, support (2 hours a month)
- Up to 10 concurrent reports.

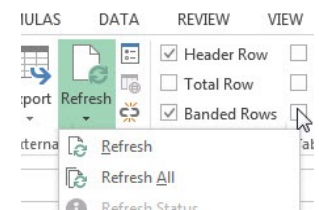

## WHAT IS NOT INCLUDED?

- Microsoft Excel

\* Windows only. Works with Mac running PC emulation.

To sign up or schedule a demo, call **1-866-496-2280** or visit our webpage at <http://www.fronteraconsulting.net/c2ctools>

## Refresh data with one click!
