

# Notify+

Pre-packaged integration for HTML notifications.

Up and running in days, not months.

100% Cloud -- Zero Hardware. Zero Installation.

as low as

# \$400 / mo.

## OVERVIEW

Notify+ is a notification service for Zuora that runs in Frontera's C2Ctools Integration Cloud. Notify+ can be quickly configured to create HTML notifications that include graphics and formatting, and can be set for any X number of days (instead of just 30, 60 or 90). Already includes simple configurations for late payments and subscription expiration. Others can be custom-built.

To sign up or schedule a demo, email [sales@fronteraconsulting.net](mailto:sales@fronteraconsulting.net) or visit our webpage at <http://www.fronteraconsulting.net/c2ctools>

## USE CASES

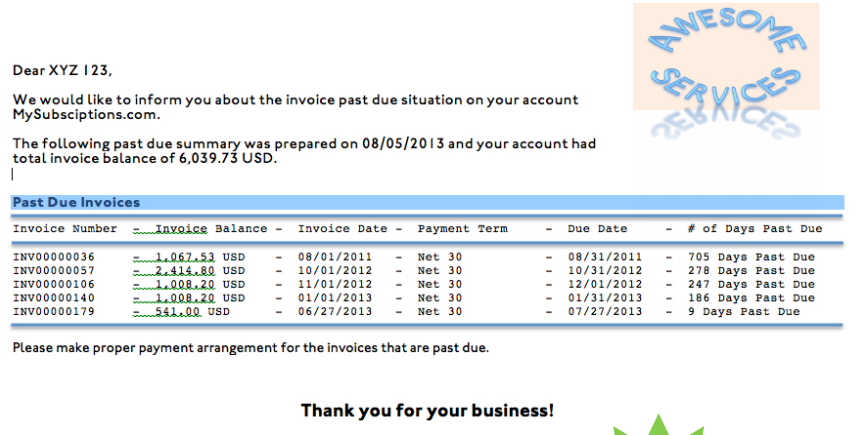

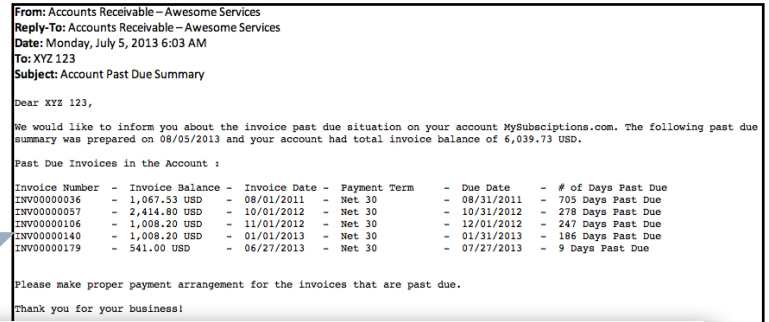

- HTML notifications on Zuora events
- Need to send X days in advance, not 30, 60, 90
- Need to manage bounces, use internal SMTP

## WHAT IS INCLUDED?

- **Advance/Late Payment Notification**
- **Subscription AutoRenewal/Expiration**
- Access to control panel for set up
- Setup/configuration of Zuora components

## WHAT IS NOT INCLUDED?

- Custom notifications (unless added)
- SMTP Gateway (uses customer gateway)
- e-mail "campaign" reports & statistics

## PRICING

	Contract Term	12 Month	Monthly
<b>Monthly Service Fee.</b> Includes all necessary hosting, scheduling, monitoring and support <sup>1</sup>		400	500
<b>Non-monthly:</b>			
<b>One-Time Setup.</b> Includes initial assessment of requirements and data volumes, provisioning on C2Ctools, tenant configurations and any manual setup of code objects.		2000	one-time
<b>Custom Development.</b> Any modifications or enhancements to the standard offering. <sup>1</sup>		149	per hour

<sup>1</sup> Development time is generally 40-50% of a typical development cycle due to the nature of the C2C infrastructure.
